

# Every software organization wants to be innovative, scalable and secure

That is possible only if you and your team can spend time developing, rather than managing your software application. Then you (must) know there is a whole world available... within the Public Cloud.

## Intercept empowers software driven companies with Microsoft Azure

We believe that software driven organizations are best off in Azure. We empower you by migrating, improving and managing your Cloud environment.

### Why Azure & Intercept?

You and your team can spend more time on building awesome software

Never worry about your security and monitoring anymore

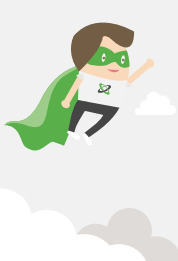

Spend more focus and energy on building your future proof company

## Your journey

Already on Azure or not (yet)? It doesn't matter where you come from. Whether your starting point is on premise, hosted, multicloud or Hybrid. You can always choose to take the advantages of the Cloud by using our Roadmap to success.

### Going to Azure

Migrate your application and improve your current Azure environment.

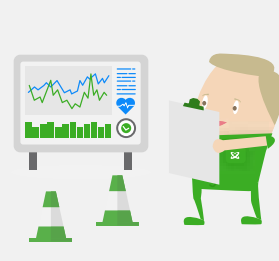

[Read more](#)

### Accelerate with Azure

Already on Azure? Optimize & modernize your platform.

[Read more](#)

### Continuous Improvement

We continuously optimize your environment.

## What can you expect?

Our working method

### Step 0 Get a free introduction to Azure

We give various workshops for every level and interest; basics & deep dives. Visit one or multiple workshops and gain practical insights. And of course: meet us and talk to our experts. After this you will know your next Azure steps.

[Book a free workshop](#)

### Step 1 Cloud Design session

In this session we will discuss your business plans for the coming year(s). We convert your plans into Azure building blocks, based on your needs. Together we choose the best fit for your organization. We calculate your Azure costs based on this design.

[Read the 3 aspects of our Cloud Design](#)

### Step 2 Migrate to or Build on Azure

With our proven and practical roadmap, we support you in every step of your Cloud Journey. We migrate your application or modify it to perform optimally in the cloud. With our strategy you benefit immediately from the primary cloud advantages!

[Learn how you can benefit directly](#)

### Next steps: Get support and grow

Our goal is to offer support that fits your business needs. We continue to optimize and simplify the way you receive support from us.

We developed 3 level service plans. See which one will suits your organization best.
